DESIGNING A WORLD OF POWER

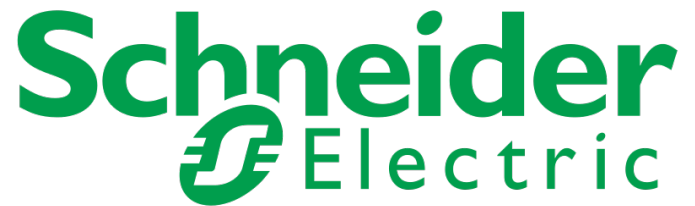

Schneider Okken

IEC Motor Control Center (MCC)
and Switchboard Manufacturing Agreement with EPD

Electronic Power Design, Inc. (EPD), an electrical systems integrator with more than 29 years of experience in various industries worldwide, is proud to be the authorized manufacturer for Schneider Electric IEC Okken Switchboards and Motor Control Centers (MCCs) in the United States. Through this partnership with EPD, Schneider Electric will manufacture Okken global products in the U.S. for the first time.

Together, EPD and Schneider Electric will have the ability to produce and provide IEC equipment built in the U.S. for export to the world markets/industries.

With more than 100,000 cubicles installed worldwide Okken IEC equipment brings power distribution up to 7300 A, motor control up to 250 kW, and provides safety and reliability combined with a compact footprint.

Okken, the intelligent switchboard and motor control center solution

- The industry's safest live parts protection
- Resistance to corrosive environments
- Tough enough for oil and gas applications
- Optimized for marine installations
- Durability for seismic areas
- Smart devices to improve productivity and energy efficiency
- Compact, modular design that's the right fit for your application
- A robust architecture, type-tested, standardized modules and integrated accessories work together improve functionality, safety, continuity of supply and installation reliability even in the most difficult environments
- Full type tests as per IEC 61439-1 & 2, ensure complete electrical installation and operational safety.
- Internal arc risks are greatly reduced thanks to our exclusive Polyfast® system which offers isolation and internal arc containment up to 100 kA / 0.5 s (IEC 61641 V2, AS3439-1) on all 3 positions of withdrawable drawers
